

A.N. HAYHURST – Publications

1. **A.N. Hayhurst and T.M. Sugden**, "Non-equilibrium ionization in flames and magnetohydrodynamic power generation". *Aeronautical Research Council*, 1962, 24,040, C.F.605, pp. 1-8.
2. **A.N. Hayhurst and T.M. Sugden**, "Non-equilibrium ionization in flames", *Institute of Electrical Engineers, Conference Report Series*, 1963, 4, 126 – 127.
3. **A.N. Hayhurst and T.M. Sugden**, "The ionization processes associated with metallic additives in flame gases". *IUPAC XX International Congress (Symposium on Low Temperature Plasmas)*, Moscow, 1965, (published by I.U.P.A.C.), 1-35.
4. **A.N. Hayhurst and T.M. Sugden**, "Mass spectrometry of flames". *Proceedings of The Royal Society, A*, 1966, 293, 36-50.
5. **P.F. Knewstubb, A.N. Hayhurst and N.R. Telford**, "Ions of low mass number in hydrocarbon flames". *Nature*, 1966, 212, 504.
6. **A.N. Hayhurst and N.R. Telford**, "Reactions of the hydroxonium ion with metal atoms in flames". *Nature*, 1966, 212, 813-814.
7. **A.N. Hayhurst and T.M. Sugden**, "Effect of halogens on the ionization in alkali - laden hydrogen and acetylene flames". Part 2: Results and derived rate constants, *Transactions of the Faraday Society*, 1967, 63, 1375-1384.
8. **A.N. Hayhurst and P.J. Padley**, "Mass spectrometric observations of ions in flow discharges". *Transactions of the Faraday Society*, 1967, 63, 1620-1630.
9. **A.N. Hayhurst**, "Alkali-metal ions and their monohydrates in the gas phase". *"The Alkali Metals" (Special Publication No. 22)*, London, The Chemical Society, 1967, 139-146.
10. **A.F. Ashton and A.N. Hayhurst**, "Flame photometric determinations of diffusion coefficients, Part 1 - Experimental and theoretical considerations". *Transactions of the Faraday Society*, 1970, 66, 824-832.
11. **A.F. Ashton and A.N. Hayhurst**, "Flame photometric determinations of diffusion coefficients, Part 2 - Results for sodium". *Transactions of the Faraday Society*, 1970, 66, 833-842.
12. **A.N. Hayhurst and N.R. Telford**, "Diffusional effects in premixed laminar flames of hydrogen, oxygen and nitrogen". *Combustion and Flame*, 1970, 14, 303-312.
13. **A.N. Hayhurst and N.R. Telford**, "Charge exchange reactions of H_3O^+ with metals in flames". *Transactions of the Faraday Society*, 1970, 66, 2784-2793.
14. **A.N. Hayhurst and N.R. Telford**, "The occurrence of chemical reactions in supersonic expansions of a gas into a vacuum and its relation to mass spectrometric sampling". *Proceedings of the Royal Society, A*, 1971, 322, 483-507.
15. **A.F. Ashton and A.N. Hayhurst**, "Flame photometric determinations of diffusion coefficients, Part 3 - Results for nitric oxide". *Transactions of the Faraday Society*, 1971, 67, 2348-2353.
16. **A.N. Hayhurst, F.R.G. Mitchell, and N.R. Telford**, "A quadrupole mass filter designed for flame ionization studies". *International Journal of Mass Spectrometry and Ion Physics*, 1971, 7, 177-187.
17. **A.N. Hayhurst and N.R. Telford**, "Kinetics of thermal ionization of alkali metals in flames". *J.Chem. Soc., Faraday Transactions 1*, 1972, 68, 237-248.

18. **A.N. Hayhurst and N.R. Telford**, "Kinetics and heats of the reactions $H + H + OH = H_3O^+ + e^-$ in flames". *Nature, Phys. Sci.*, 1972, 58, 114-115.
19. **A.N. Hayhurst and D.B. Kittelson**, "Kinetics of the gas phase reactions $MOH^+ + e^- = M + OH$ or $MO + H$, with M being Ca or Sr". *J. Chem. Soc., Chemical Communications*, 1972, 422-423.
20. **A.N. Hayhurst and D.B. Kittelson**, "The measurement of hydrogen atom concentrations in flames". *Nature, Phys. Sci.*, 1972, 235, 136-137.
21. **A.N. Hayhurst and D.B. Kittelson**, "A determination of the ionisation potentials of CaOH and SrOH". *Combustion and Flame*, 1972, 19, 306-308.
22. **A.F. Ashton and A.N. Hayhurst**, "Flame photometric determinations of diffusion coefficients, Part 4 - Results for lithium, potassium, rubidium and caesium". *J. Chem. Soc., Faraday Transactions 1*, 1973, 69, 652-659.
23. **A.F. Ashton and A.N. Hayhurst**, "Kinetics of collisional ionization of alkali metal atoms and recombination of electrons with alkali metal ions in flames". *Combustion and Flame*, 1973, 21, 69-75.
24. **A.N. Hayhurst and D.B. Kittelson**, "Mechanism and kinetics of production and recombination of ions arising from additives of alkaline earth elements in flames of $H_2/O_2/N_2$ ". *Combustion Institute European Symposium 1973*, ed. F.J. Weinberg (Academic Press, 1973) pp. 261-265.
25. **A.F. Ashton and A.N. Hayhurst**, "Measurements of the diffusion coefficients of alkali metal additives in atmospheric pressure flames from 1920 to 2520 K". *Combustion Institute European Symposium*, 1973, ed. F.J. Weinberg (Academic Press, 1973), pp. 735-740.
26. **N.A. Burdett and A.N. Hayhurst**, "Kinetics of formation of chloride ions in atmospheric pressure flames by way of $HCl + e^- \rightarrow H + Cl^-$ ". *Nature, Phys. Sci.*, 1973, 245, 77-79.
27. **N.A. Burdett, A.N. Hayhurst and C. Morley**, "The rate constant of the gas phase reaction $H_3O^+ + Cl^- \rightarrow H_2O + HCl$ ". *Chemical Physics Letters*, 1974, 25, 596-598.
28. **A.N. Hayhurst and D.B. Kittelson**, "Ionisation of alkaline earth additives in hydrogen flames I. Hydrogen atom concentrations and ion stabilities". *Proceedings of The Royal Society, A*, 1974, 338, 155-173.
29. **A.N. Hayhurst and D.B. Kittelson**, "Ionization of alkaline earth additives in hydrogen flames II. Kinetics of production and recombination of ions". *Proceedings of The Royal Society, A*, 1974, 338, 175-195.
30. **A.N. Hayhurst**, "Mass spectrometric sampling of combustion plasmas", *I.E.E.E., Transactions on Plasma Science*, 1974, 2, 115-122.
31. **A.N. Hayhurst and N.R. Telford**, "The kinetics of dissociative recombination of free electrons with hydronium ions in premixed flames". *J. Chem. Soc., Faraday Transactions 1*, 1974, 70, 1999-2010.
32. **A.N. Hayhurst and H.A.G. McLean**, "Mechanism for producing NO from nitrogen in flames". *Nature*, 1974, 251, 303-305.
33. **A.N. Hayhurst and N.R. Telford**, "The proton affinity of water and the kinetics of production of H_3O^+ in flames of H_2 , O_2 and N_2 ". *J. Chem. Soc., Faraday Transactions 1*, 1975, 71, 1352-1362.

34. **A.F. Ashton and A.N. Hayhurst**, "Measurements of the diffusion coefficients of trace additives (the alkaline earths and copper) in atmospheric pressure flames from 1900 to 2520 K", *2nd European Combustion Symposium*, 1975, 171-176.
35. **N.A. Burdett and A.N. Hayhurst**, "The kinetics of formation of chloride ions in atmospheric pressure flames by $\text{HCl} + \text{e}^- \rightarrow \text{H} + \text{Cl}^-$ ". *Proceedings of The Combustion Institute*, 1975, 15, 979-990.
36. **N.A. Burdett and A.N. Hayhurst**, "The rate constants for ion-ion recombination in $\text{H}_3\text{O}^+ + \text{X}^- \rightarrow \text{HX} + \text{H}_2\text{O}$ with $\text{X} = \text{Cl}, \text{Br}$ or I , from studies in $\text{H}_2/\text{O}_2/\text{N}_2$ flames". *2nd European Combustion Symposium*, 1975, 55-59.
37. **A.F. Ashton and A.N. Hayhurst**, "Flame photometric determinations of diffusion coefficients, Part V - Results for $\text{Ca}(\text{OH})_2$, $\text{Sr}(\text{OH})_2$, $\text{Ba}(\text{OH})_2$ and Cu ". *J. Chem. Soc., Faraday Transactions I*, 1976, 72, 208-215.
38. **N.A. Burdett and A.N. Hayhurst**, "Cross-sections for gas phase ion-ion recombination in $\text{H}_3\text{O}^+ + \text{X}^- \rightarrow \text{HX} + \text{H}_2\text{O}$ for $\text{X} = \text{Cl}, \text{Br}$ or I ". *J. Chem. Soc., Faraday Transactions I*, 1976, 72, 245-256.
39. **A.N. Hayhurst and N.R. Telford**, "Mass spectrometric sampling of ions from atmospheric pressure flames I: Characteristics and calibration of the sampling system". *Combustion and Flame*, 1977, 28, 67-80.
