

Department of Chemical Engineering and Biotechnology

CEB CAREER TALKS
Thursday 24 October 2013, 4 pm @ LT1

David Hart
Energy Intelligent Solutions

‘Making Energy Efficiency Your Business’

What are the roles for Cambridge Chemical Engineers in the energy efficiency world in the UK? What are the big issues in energy? David Hart will use case studies to illustrate what support businesses need to reduce energy and carbon emissions, from large process companies to multi-site commercial organisations? David will also discuss the skills required to be an energy efficiency consultant and how to establish and run a sustainable business.

Biography: David Hart is a Chartered Chemical Engineer. After graduating from Cambridge in 1984, he worked for WS Atkins (Engineering Consultants) for 5 years and then March Consulting (Energy Consultants). In 1992, he established Energy Intelligent Solutions and now provides energy efficiency and carbon management advice and solutions to industrial and commercial organisations in the UK. David specialises in energy efficiency, refrigeration and data analytics and is currently working on projects for organisations as diverse as BP, ASDA, Marston's, Carlsberg, M and B, Carrs Milling and IFF.

Department students, graduates, academics and support staff are invited to attend this talk. Register with Elena on eg314@cam.ac.uk or www.ceb.cam.ac.uk/pages/ceb-career-talks.html
